EXPERIENCE

Grin Technologies

Jan. 2025 – Present

Full stack Laravel Developer

Nagpur, Maharashtra

- Developed and maintained financial and WordPress-based applications
- Designed and developed the **Eazy Collect** finance platform from scratch, including backend development, database design, APIs, and admin panel
- Worked on finance modules like EMI management, mandate processing, and customer workflow systems
- Developed and integrated secure REST APIs for third-party services, improving system scalability and data communication.
- Awarded a **Strategist Certificate** for outstanding contribution and problem-solving skills

Livlyworks

Nov. 2023 – Dec. 2024

Full stack Laravel Developer

Nagpur, Maharashtra

- Developed and maintained web applications using Laravel MVC architecture, PHP, MySQL, JavaScript, AJAX, HTML, and CSS
- Worked on a matrimonial platform and implemented interest matching features with paid and trial access logic
- Developed functionalities for an online book publication platform, including book purchase and rental systems
- Built and optimized backend modules, database queries, and user workflows for better performance and scalability

ISRI Technologies

May 2023 – Oct. 2023

Front End Developer

Ghatkopar, Mumbai

- Developed responsive frontend pages using HTML, CSS, JavaScript, and jQuery
- Created and maintained multiple web pages integrated with Microsoft SharePoint
- Collaborated with team members to understand requirements and deliver user-friendly solutions
- Improved UI responsiveness and ensured cross-browser compatibility across projects

PROJECTS

Eazy Collect - Loan Finance & Mandate Management System

- Developed a Loan Finance Web Application with UPI AutoPay eNACH integration using Laravel MVC architecture, including end-to-end REST API development for mandate creation and management using PHP, MySQL, HTML, AJAX, CSS, Bootstrap, and JavaScript.

- Built an automated mandate system supporting monthly, quarterly, and yearly debit cycles with cron jobs and EMI reminder SMS notifications.
- Created multi-level panels (Admin, Distributor, Super Distributor, Dealer & Dealer App) with a secure Mandate Key purchase system.
- Implemented a Settlement Module for T+3 payment settlements and real-time customer mandate tracking across all panels.
- Integrated Credit Score APIs with key-based deduction logic for dealer-side customer credit score checks.

Loan Management & EMI Tracking Platform

- Developed a Loan Management System with separate Admin and Dealer panels using Laravel MVC architecture, PHP, MySQL, HTML, CSS, JavaScript, and REST APIs
- Developed a complete loan creation and approval workflow allowing dealers to submit loan applications and admins to verify and approve requests efficiently.
- Developed EMI management functionality to display paid, pending, and upcoming EMI schedules based on loan frequency
- Implemented cash collection and settlement modules to automatically update payment records and loan balances
- Integrated Aadhaar and PAN verification APIs to validate customer details before loan creation
- Created and integrated REST APIs for seamless data communication and third-party service integration

Matrimonial Site

- Developed a Matrimonial Web Application with interest matching and age-based matching functionality using Laravel, PHP, MySQL, HTML, CSS, Bootstrap, JavaScript, Ajax, Alpine.js
- Implemented algorithms to suggest profiles based on similar interests and user preferences
- Implemented wishlist and profile filtering features to improve user personalization and matchmaking experience.
- Developed paid membership and limited-access functionality to manage premium user features and profile visibility

EDUCATION

Yashwantrao Chavan Maharashtra Open University
Bachelor of Commerce

Aug. 2022 – May 2024
Nagpur, Maharashtra
